DYNAMIC GLOBAL SOLUTIONS presents its **QIPP** and **QIPPM** solutions for small to mid-sized businesses. These programs are designed to install an information protection program quickly and with quality.

As a small business, we understand the challenges in meeting clients' requirements regarding information protection and data security. Additional regulatory requirements and good business practices increase needs and multiply the challenges. **We can help.**

With an eye on your budget we help you outline and implement a practical security program that will satisfy your clients, meet regulatory requirements and protect you from security breaches. Our approach is customized to your needs but stresses a program of basic safeguards that are easy to implement and manage. We work with you to establish ongoing management of the program whether through staffing or outsourcing and help you understand the world of information security—quickly and with quality!

DGS Services
